## Phone Access Codes

**Voicemail** : To initialize voicemail, call from your phone and dial 503-837-0999. The temporary password is the last four digits of your phone number. Then follow the prompts to setup your personalized greeting and to change your password. Retrieve your voicemail messages by dialing \*318. You can also retrieve your telephone messages audibly by going to [webmail.minetfiber.net](http://webmail.minetfiber.net). You will need to put in your telephone number and the last four digits of your phone number for the PIN. You can also retrieve your voicemail from a different phone by dialing your telephone number, then pressing \* after the greeting. Then enter your PIN. This will retrieve your message.

**3-Way Calling** : Dial the first telephone number. Wait until the other party picks up the call. While they are still on the line, press the flash option on your telephone. If you do not have the flash options, then press the receiver hook on your telephone. Proceed to dial the second telephone number. Wait for the second line to answer, then press flash or click the receiver hook again. This will connect all three parties to the same telephone conversation.
